

Louisville

Zone offense (1)

1

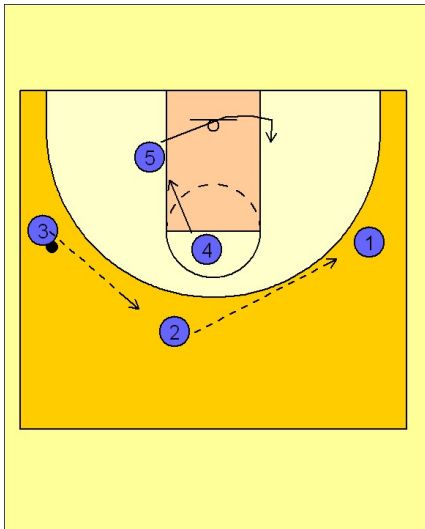

Louisville Zone Offense

Not a lot of complicated movement from Louisville on their zone offense. Some good solid fundamentals, drive and kick opportunities, and the post players working together on the blocks and the high post.

The perimeter players will usually pass and cut away bringing a new perimeter player to the top for ball reversal.

2

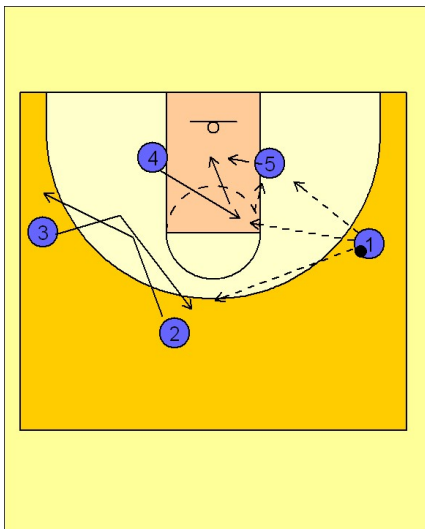

Louisville Zone Offense

The post players like to work behind the zone defenders looking to break into good scoring opportunities on the blocks and high post areas.

(#4) and (#5) will circle in the post as well as "X" as the ball is reversed from side to side.

3

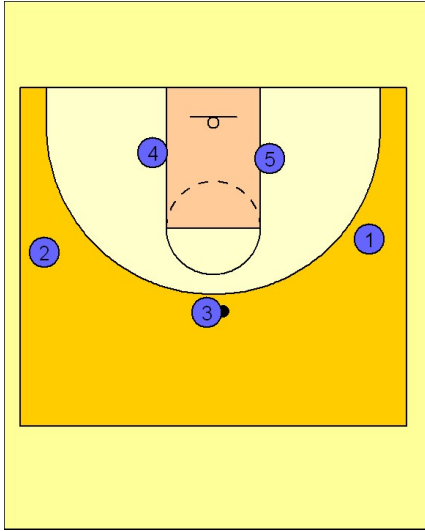

Louisville Zone Offense

Anytime a player receives the ball in the high post, the low post man will duck in hard looking for a high / low post pass from (#4). If (#5) receives the ball in the post, the perimeter players will again, like their man offense, screen or move away on the perimeter and bring a new perimeter player to the ball. The high post player (#4) will always dive to the basket when the low post player (#5) receives the ball.
