

Gonzaga

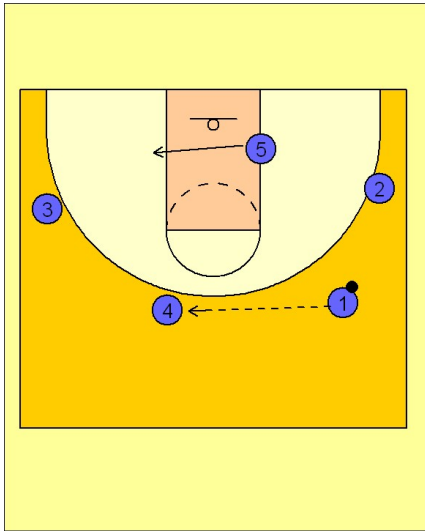

Early offense (3)

1

Gonzaga Early Offense

This is a great counter to their usual early offense alignment. Normally, Gonzaga will reverse the ball to #4, slide #5 across and then look to back screen for #4 for the lob.

Lets now look at a great counter to this play that Gonzaga will use maybe four or five times throughout the game.

2

Gonzaga Early Offense

Instead of back screening, #2 makes the same movement into the lane and up to the free throw line area. Instead of #4 passing to #3 and getting a back screen from #2, he now hits #2 with a pass at the free throw line while #1 breaks to the basket for the back door pass.
