### Florida Zone Offense

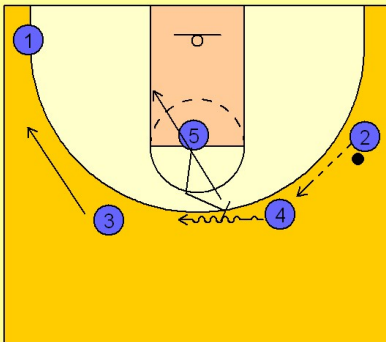

Florida likes to flood the floor with three point shooters, which isn't too difficult at times for Florida with the type of great shooting perimeter and post players they recruit.

(#5) will work the post area high and low and has the option to step out and ball screen or back screen the zone at any time. He may step out on the perimeter for a shot as well making it very difficult for the zone defenders to cover that many spots on the perimeter.

Players will pass the ball along the perimeter and cut through the lane and replace to an open area on the right or left. Other players will move over to fill gaps left by cutting players.

2

### Florida Zone Offense

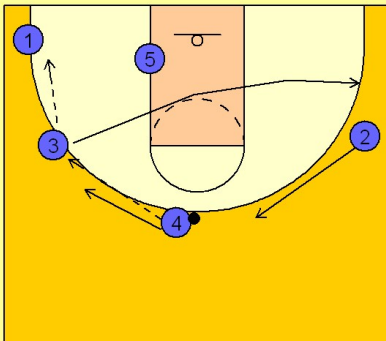

At anytime the post player may step out and screen. Here we see (#5) setting a ball screen for (#4) and then will roll to the basket or step back after screening if he has the range.

The other players will slide over on penetration from the top for the kick out pass if their defender helps on penetration.

3

### Florida Zone Offense

Here we see more ball movement and man movement as the ball is reversed. (#3) cuts through on the pass to the corner man (#1) while (#4) and (#2) fill the open areas on top.

### Florida Zone Offense

The post player is not the only player permitted to ball screen. At anytime, any of the perimeter players may pass and screen on the ball, much like their man offense. The screener can again roll to the basket or step out depending on his range and how the defense plays the pick and roll.
